

SCOPE

With an increasing focus on the environment and sustainable development, various opportunities in environmental management have opened up for control systems, including applications commonly considered outside the scope of process control.

This workshop will bring together practitioners, engineers managers and others working in diverse fields, with the common thread being the use of process control to address environmental issues.

Attendees would benefit by gaining insight into the environmental challenges facing different industries and how these issues have been addressed using process control.

WHO SHOULD ATTEND

- Engineers, technicians, graduates and everyone else involved or interested in automation, advanced control and environmental management.
- Engineers, technicians and graduates from the process and manufacturing industries.
- Suppliers and consumers of process control equipment and technologies.
- Managers responsible for the plant automation function.

VENUE

Glenburn Lodge – See map on reverse side.

HOW TO REGISTER

Please complete the attached enrolment form and send it to Jean McKenzie.

Fax: (011) 482-2000

E-mail: jeanemck@jcci.co.za

Invoices will be sent to delegates.

PROGRAMME

8:30 Registration (tea/coffee)

9:00 Session 1

Welcome	Dr. R.H. Roberts, SACAC
Rome is burning	Dr P.J. Aucamp, Ptersa Environmental Management Consultants
Plantwide Cyanide Monitoring and Control	H.S. Smit Mintek

10:30 Tea/coffee

10:50 Session 2

TBA	TBA Citect
Supplying the demand on dark, windless days - low- load control of coal fired boilers	Prof. Ed Boje UKZN
TBA	W. Suzor, ABB

12:50 Lunch

13:50 Session 3

Optimising emissions in refinery fuel gas systems	TBA Blu ESP
Managing Process Energy & Emissions	Noël Simpson Honeywell

15:30 Evaluation and tea/coffee

WORKSHOP FEES

SACAC members: R 1100

Non-members: R 1400

Bona Fide Students: R 400

Fees include a CD of the presentations, tea/coffee during the morning and afternoon breaks and a luncheon.
